

Find Your Ditto™

Lead Software Developer

Find Your Ditto is an early-stage digital health startup seeking a qualified Lead Software Developer to continue iterating the company's revolutionary peer-support mobile platform.

About Find Your Ditto™

150 million adults in the US live with a chronic illness. Often called "invisible" illnesses, feelings of loneliness and isolation are often pervasive among these communities, leading to poor self-care and a \$500B unnecessary healthcare spend annually. In a shifting reimbursement ecosystem emphasizing the importance of patient outcomes over volume, Find Your Ditto is Redefining Peer Support™ with its mobile platform that provides personalized, on-demand, and in-person peer support for chronic illness communities while harnessing invaluable patient outcome data.

Responsibilities

- Support complete software development lifecycle for our growing suite of healthcare data-driven applications
 - Architect, develop, test, deploy, release and maintain native application, including servers, databases, and security
- Innovate new features with product development team
- Stay up-to-date with new technology trends and leverage them for the FYD ecosystem
- Employ creative freedom to augment company development
- Work upon existing UX/UI design

Requirements

- Experience with native and/or mobile applications
 - Preference for React Native, Django, AWS
- Self-starter personality with former startup/small company experience
- Understanding of HIPAA compliance and web development are a plus

Location

- Remote; reporting to CEO in Chicago

Compensation

- Initial equity hire for strong candidate with salary deliverable upon finalization of seed round
